NIM : 244107020078

Kelas : 1B

## Percobaan 1

## Pertanyaan

1. Jelaskan perbedaan perintah git commit dan git push?
2. Apakah bisa alurnya dibalik, membuat folder atau proyek terlebih dahulu kemudian upload (push) ke Github? Jika bisa, buktikan!

## Jawaban

1. Git commit : perintah untuk menyimpan perubahan  
Git push : perintah untuk mengirim perubahan
2. Bisa
  - Buat folder baru di vscode
  - Masuk ke folder clone sebelumnya, select README.md dan folder .git, lalu copy (pastikan ini sudah versi terbaru)
  - Paste folder .git dan README.md ke folder baru untuk test tadi
  - Kembali ke vscode dan cek perubahan, jika file baru ada tanda 'U' maka tandanya sudah berhasil
  - Berikan commit dan push filenya
  - Selesai

## Percobaan 2

The image shows a development workflow. The top part is a screenshot of Visual Studio Code (Administrator) with a Java project named 'MyFirstJavaGithub01'. The code in 'MyFirstJavaGithub01.java' is as follows:

```
1 public class MyFirstJavaGithub01 {
2     public static void main(String[] args) {
3         System.out.println("Hello from Github");
4     }
5 }
```

The bottom part of the VS Code window shows a terminal with the following commands and output:

```
a 0), pack-reused 0 (from 0)
To https://github.com/Abimmm/daspro-josheet2.git
* [new branch]    main -> main
PS D:\josheet2\daspro-josheet2> git branch perkedel
PS D:\josheet2\daspro-josheet2> git checkout perkedel
Switched to branch 'perkedel'
PS D:\josheet2\daspro-josheet2>
```

A notification from the 'Git (Extension)' asks: 'Would you like Visual Studio Code to periodically run "git fetch"?'. The 'Yes' button is highlighted.

The bottom part of the image is a screenshot of the GitHub web interface for the repository 'Abimmm/daspro-josheet2'. It shows the 'branches' tab with the following information:

Branch	Updated	Check status	Behind	Ahead	Pull request
main	39 minutes ago				Default

Below this, a message states: 'Your main branch isn't protected'. It suggests protecting the branch by requiring status checks before merging. A 'Protect this branch' button is available.

Under 'Your branches', there is a table for the 'perkedel' branch:

Branch	Updated	Check status	Behind	Ahead	Pull request
perkedel	4 minutes ago		0	1	#1

Under 'Active branches', there is another table for the 'perkedel' branch:

Branch	Updated	Check status	Behind	Ahead	Pull request
perkedel	4 minutes ago		0	1	#1

## Pertanyaan

1. Jelaskan fungsi dari Pull requests!
2. Mengapa kita perlu membuat sebuah branch, manfaatnya apa?

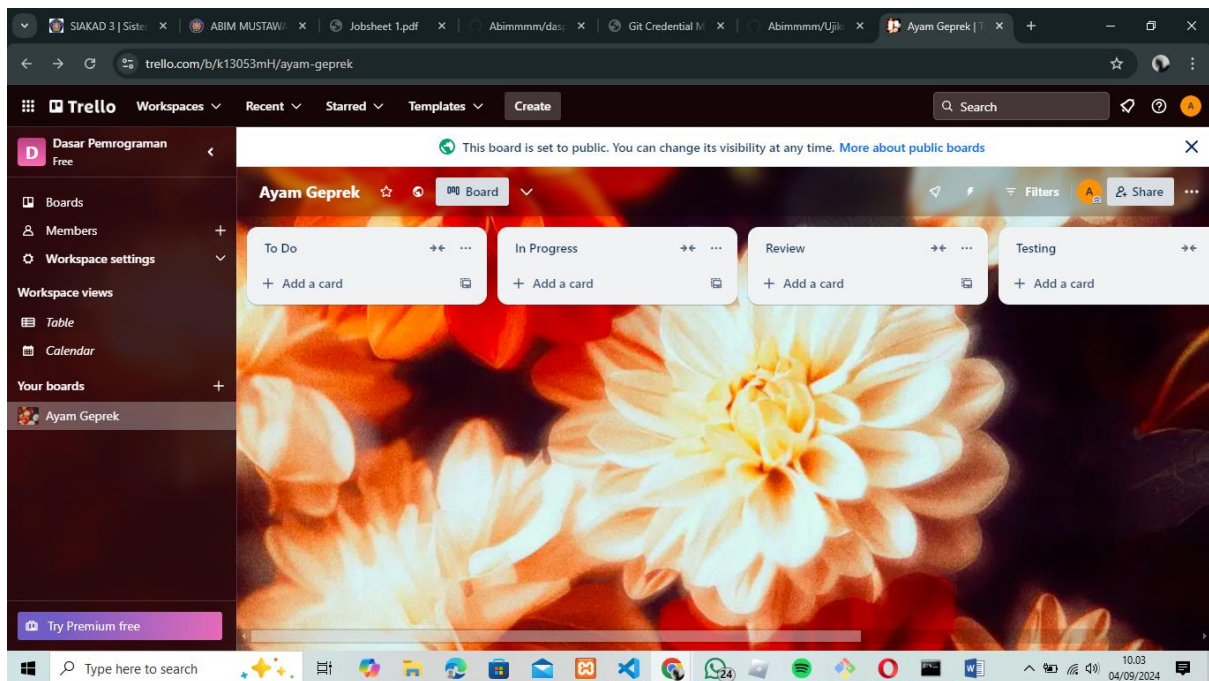

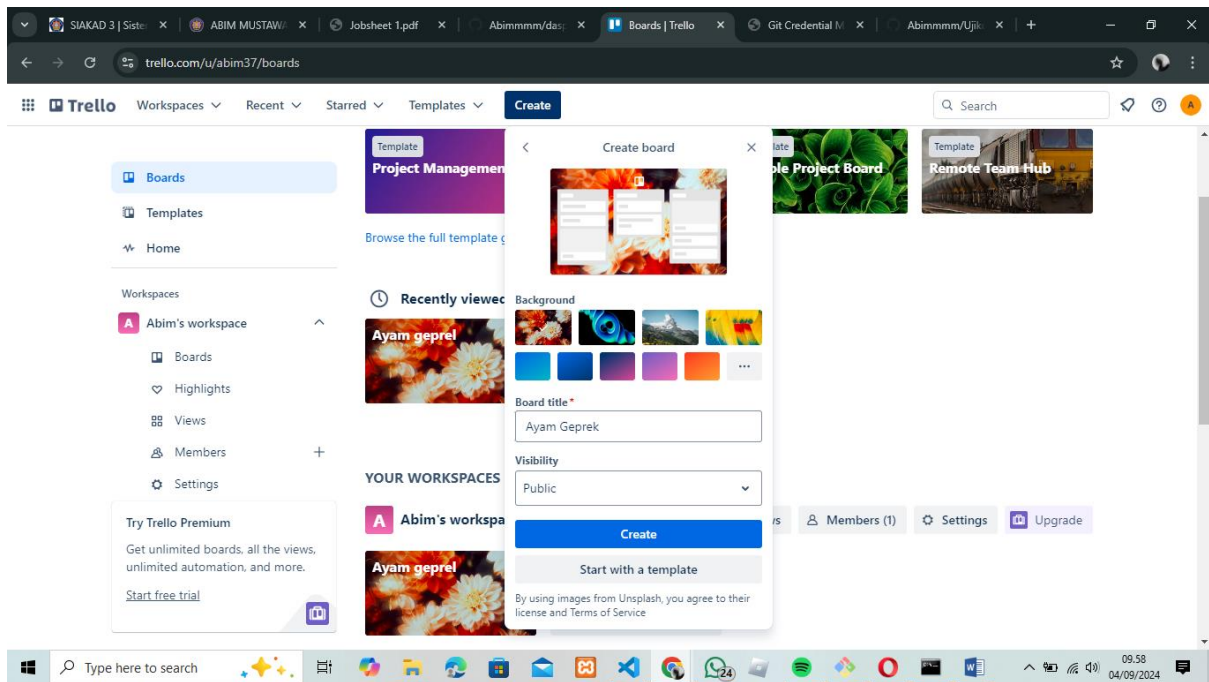

## Jawaban

1. Fungsi pull request adalah untuk mengusulkan perubahan
2. Untuk menghindari bug pada kode utama, manfaat branch yaitu untuk membuat fitur baru

## Percobaan 3

## Pertanyaan

1. Bagaimana langkah yang dilakukan untuk mengundang anggota tim untuk bergabung ke dalam board Anda?
2. Apakah memungkinkan untuk membuat Board tidak dari awal (menambahkan list satu per satu), jika mungkin bagaimana caranya?

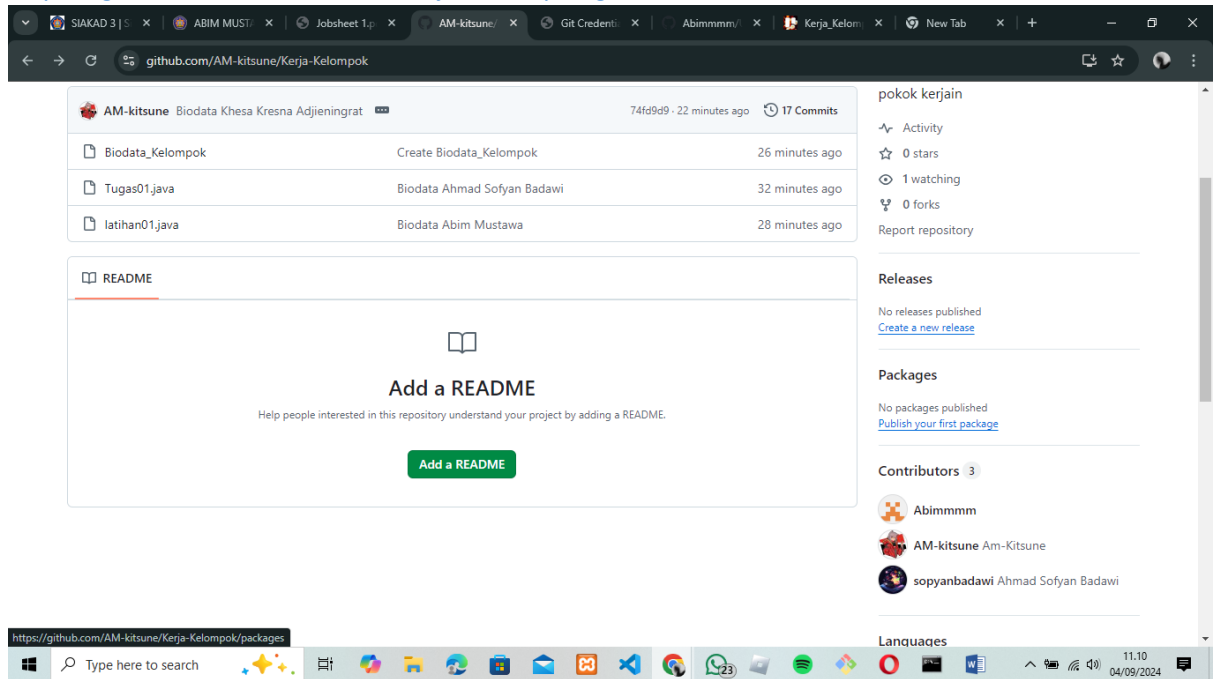

## Jawaban

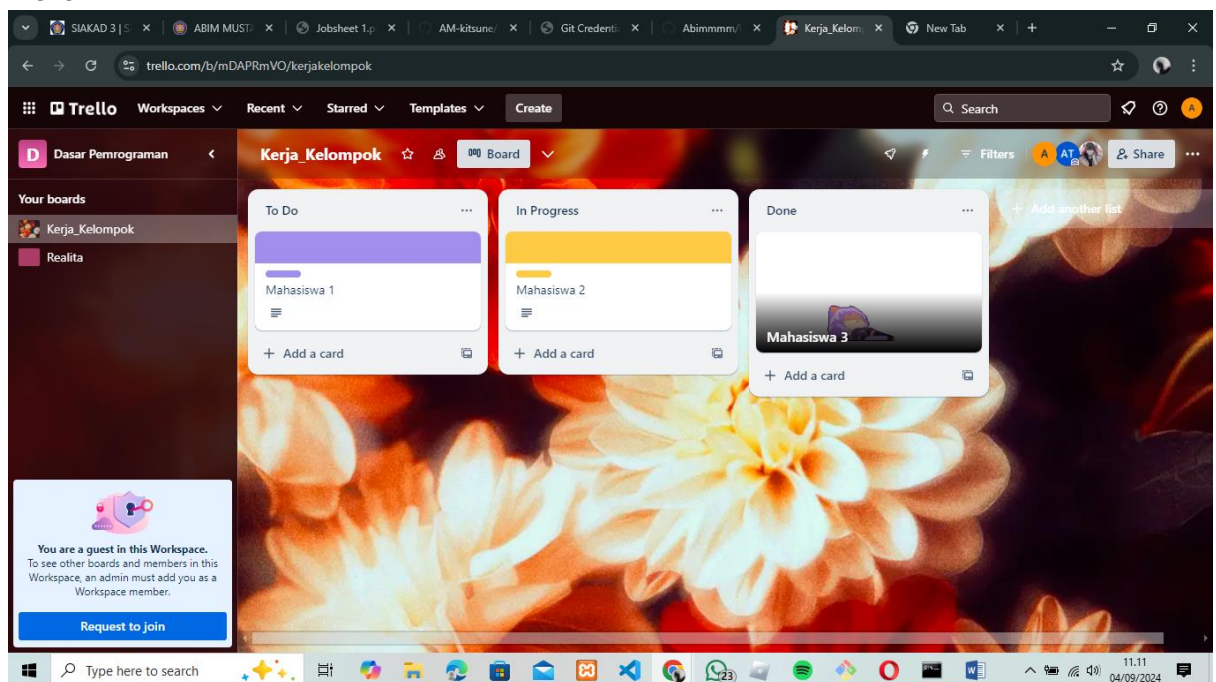

1. Buka board yang anda miliki, kemudian klik share yang ada di pojok kanan atas, kemudian masukan email teman yang ingin anda undang dan klik share.
2. Ya memungkinkan,
  - Buat board baru dengan template
  - Pilih template boardnya
  - Beri nama pada boardnya
  - Dan board dengan template sudah berhasil

## TUGAS

1. Kelompok :
  - Ahmad Sofyan Badawi (04)
  - Abim Mustawa (01)
  - Khesa Kresna Adjieningrat (14)
2. <https://github.com/AM-kitsune/Kerja-Kelompok.git>

3. Trello
